

Digital Futures 2016

Could your business offer a paid work placement in August or September 2016 to a talented, local young person?

*In July 2016, **The Bridge at Waterloo** will take sixteen Lambeth residents aged between 18-30 through an intensive four week programme designed to equip them with a thorough grounding in creative technology, and prepare them for employment.*

*To showcase their achievements our candidates will design and develop a web application that allows an audience to interact with a live performance. Through this hands-on learning process, the candidates will cover key areas such as **User Experience (UX) Design, Web Development and Cybersecurity.***

***Our candidate will be able to join an existing project team and add value extremely quickly.** If you need a marketing website put together, to improve the integrity of data inside your CRM or have an idea for an app that would transform your business, our candidate will be able to help you realise it.*

***We help them** by giving them a foundation in the core principles of creative technology. We unlock potential and foster confidence in their abilities through a series of employability seminars and we continue to support them throughout their training and work placement by assigning them a personal mentor.*

***You gain** the recruitment and CSR benefits that come with offering a placement to local young person who is passionate, hard-working and up-to-speed with the latest technologies.*

***They gain** a step- up into employment and a chance to prove their skills, and move closer to their aspiration of a fulfilling future career.*

OPEN DAY

*We're interested in learning as much as possible about the challenges facing your organisation and to create a curriculum as relevant as possible to your specific needs. Why not join us on **Saturday 21st May, 11am -5pm** to meet with the Bridge at Waterloo team, our partner organisations, our course leader and key speaker **Ali Blackwell** and the candidates, and test your own skills with our Digital Futures taster session. Full details can be found by visiting our website www.bridgeatwaterloo.org. Please RSVP to TBAW@STJOHNSWATERLOO.ORG*
